HEALTH ADVISORY

Community Health partnership to plan and execute COVID-19 testing

Community Health is the collaboration between Local Public Health Units (LPHUs), Critical Access Hospitals, pharmacies and others; the North Dakota Department of Health (NDDoH) is calling on the Community Health partnership to get their communities scheduled and tested for COVID-19 based on locally determined priorities.

NDDoH will make 1,000 tests per day available to Community Health. Additional capacity will be built soon. Scheduling and testing will be conducted at a local level by Community Health partners.

To schedule testing, receive testing supplies and receive additional information, please apply online at http://health.nd.gov/CHtests.

Categories of Health Alert Network messages:

- **Health Alert**: Requires immediate action or attention; highest level of importance
- **Health Advisory**: May not require immediate action; provides important information for a specific incident or situation
- **Health Update**: Unlikely to require immediate action; provides updated information regarding an incident or situation
- **HAN Info Service**: Does not require immediate action; provides general public health information
